Group Project

Project Name: <u>**Marriage proposal web application**</u>

Description: We are going to develop a web application for marriage proposals in order to help the ones who are searching for their life partner. In this system users can enter/add their details in their own profiles which can be viewed by other users. Users can display their own proposal advertisement through this system. Anyone can register to the system and they can satisfy their requirement. System users can search for their requirements according to their preferred characteristics.

Functional Requirements
- Post the Advertisement
- Search the Brides and Bride Grooms according to age
- Automatically delete the Advertisement within 90 days
- Display each one's details
